

Potable Water Solutions

APPLICATIONS:

- ◆ Remote Camps
- ◆ Villages
- ◆ Mining
- ◆ Temp Housing
- ◆ Relief Aid
- ◆ Oil N Gas
- ◆ Military
- ◆ Arctic
- ◆ Desert
- ◆ Jungle

HIGHLIGHTS INCLUDE:

- ◆ Supply pump (submersible)
- ◆ Water line (usually heat traced due to winter camps)
- ◆ Optional Settling tank
- ◆ RPW Model 5 System housed and heated in winter
- ◆ Clean water Storage tank
- ◆ Optional Float switch for water level control
- ◆ Clean water distribution pump
- ◆ Clean water distribution tank
- ◆ Optional Chlorinator System, incl 5 gallon mother solution tank
- ◆ Line out to distribution system (supplied by customer or custom designed)

Proven Field Use in the Harshest of Conditions

Lowest Cost Per Litre in the Industry

RPW MODEL 5

19,000 Liters / 5,000 USG Per Day

Up to 60 Person Camp

Storage Tanks Available

Easy to Operate

RPWWM 530

48,000 Liters / 12,720 USG Per Day

Up to 140 Person Camp

Storage Tanks for larger Capability

Easy to Operate

RPW Model 5 & RPWWM 530

The Raymac RPW Model 5 and the RPWWM 530 provides the end user with the ability to treat fresh water sources contaminated with sediment, turbidity, dissolved organics, cysts, bacteria and virus's.

RPW Models offer the user an easy to use, plug and play water purification system including:

- Proprietary organic trap to eliminate chlorination by products such as THM's and eliminate colors resulting from tannins and organics
- Polishing filter designed to remove turbidity and cysts such as Giardia & Cryptosporidium to NSF/ANSI 53 Guidelines
- 55 Class A Certified UV disinfection system with data logging capabilities, real time dosage sampling, lamp fault detection backed by a fully automated shut off solenoid in case of a UV fault or low dosage
- Trouble free variable area flow meter with optional digital unit with advanced features and capabilities
- Optional Carbon Cartridges for the removal of taste and odors
- Optional easy to use chlorination & testing solutions using NSF/ANSI 60 approved chlorination tablets
- Optional next generation intake strainers, diesel and electric supply & distribution pumps, portable storage bladder tanks, food grade suction & supply hose, spare parts and support kits

RPW Model 5

The Raymac RPW Model 5 uses a multi barrier design incorporating a 6 stage micro filter system, proprietary organic trap and next generation NSF/ANSI 55 Class A certified UV disinfection. Optional post chlorination treatment and testing solutions are available and highly recommended any time treated water is being stored.

RPW Model 5 offers the user:

- Washable pre-filters to reduce consumables
- Compact light weight design
- Optional bladder tanks

RPWWM 530

The RPWWM 530 is a true, multi-barrier, NSF Certified System. The average power consumption is less than 2 KW.

Optional post chlorination treatment or Secondary UV barrier and testing solutions are available and highly recommended any time treated water is being stored.

RPWWM 530 offers the user:

- Washable pre-filters to reduce consumables
- Mobile east to move design
- Optional bladder tanks
